Health Screenings**

Since 2008

ICS Cancer-Focused Screenings

Cancer is the leading cause of death in the world, and **early detection** of cancer favours a **greater chance** of cure, survival, and quality of life for the patient. Thus, **since 2008**, ICS has been providing cancer-focused health screenings that include specific tests for breast, cervical, colorectal, and lung cancers for patients from Singapore and around the world.

Our **personalized cancer-focused screening services** take into account the fact that everyone is unique, with different familial, cultural, and social backgrounds.
